|----------------------------------|---------------------------------------|---------------------------------------|-----------------------------------|----------------------------|
| inactive | Brevibacterium mcbrellneri | Humibacillus sp. DSM 29435 | Mobilicoccus massiliensis | Sandaracinus amylolyticus |
| Actinomycetospora chiangmaiensis | Cellulomonas cellasea | Intrasporangiaceae bacterium URHB0013 | Mycolicibacterium obuense | Sediminihabitans luteus |
| Actinoplanes atraurantiacus | Chlamydiales bacterium SCGC AG-110-P3 | Isoptericola variabilis | Nakamurella multipartita | Silanimonas lenta |
| Agreia bicolorata | Chromatocurvus halotolerans | Kineosphaera limosa | Nesterenkonia alba | Streptomyces ambofaciens |
| Agrococcus casei | Citricoccus muralis | Kocuria flava | Nonomuraea candida | Streptomyces avermitilis |
| Allokutzneria albata | Clavibacter michiganensis | Kocuria varians | Okibacterium fritillariae | Subtercola sp. Z020 |
| Arenimonas oryzae | Clostridium combesii | Kytococcus sedentarius | Paenibacillus polysaccharolyticus | Thermomonas haemolytica |
| Arthrobacter globiformis | Dermatophilus congolensis | Leifsonia sp. Leaf325 | Pet28_3 | Virgibacillus salinus |
| Auraticoccus monumenti | Enhygromyxa salina | Luteimonas tolerans | Pseudoxanthomonas | Wenzhouxiangella sediminis |
| Bacillus sp. 7586-K | Frankiales bacterium YIM 75000 | Microlunatus phosphovorus | Psychromonas aquimarina | Xanthomonas translucens |
| Bacteriovorax sp. BAL6 X | Geodermatophilus obscurus | Micromonospora avicenniae | Rothia mucilaginosa | |
| Brachybacterium alimentarium | Granulosicoccus antarcticus | Micromonospora peucetia | Saccharothrix espanaensis | |
